Summary

Three Types of Crosswords

Among three types of crossword puzzles, prize competitions have many possible answers but also attract people.

who are fond of gambling due to big prizes. Intellectual crosswords have only one answer to the clue, which gives hints about the word and calls for some detective work which needs one's comprehension and general knowledge. Educational crosswords is a straight forward exercise where words matching definitions are placed in crossword square. This improves one's vocabulary and provides entertainment too.

(77 words)

* Interpretation of a text (5 marks); (150 words)

→ first point should be main and other sentences should support it.

→ Q(2) ⇒ Ans (2013/Chaitra): discuss / ...

This text deals with the impact of electronic media on print media. With the evolution of electronic media like CD-ROMS, online computer services and Internet, they made information available to the public electronically without the need of costly expensive printed materials. One material can be shared electronically in a group of many different people at the same time without the cost that should be paid individually for the printed materials. The transportation cost and time of printed material is very high in comparison to the electronically

exchange of materials like pdf, word, video, photo, etc. Similarly, they made the availability of the materials or news as soon as the incident happened. As the availability of electronic media increases, and as it is more easily accessible, the public has less need for printed materials. Not only the ease of access and size, electronic media are far more environment friendly than printed papers which leads to destruction of forests.

Summary

c>

Biogas

Biogas is produced by the anaerobic fermentation of organic matter such as cow dung which can be trapped in a digester or biogas plant and used as fuel for lighting and cooking. The digested slurry can be used as fertilizer. Energy crisis emphasizes scientists to show interest on biogas technology. For efficient use of cattle dung, India started family-sized plants; due to its huge number of cattle. With government support in late 1970s, there are about 1,00,000 plants, mostly domestic. This system is economically sound, in addition to cleaner and healthier environment.

Inter-office Memorandum

Date: 17th June, 2018

To: HOD

From: DHOD

Subject: functioning of Hydro lab

Please refer to your Memo No. HOD/P/18 dated 16th August asking me to examine the complaint against functioning of hydro lab and to suggest measures for improvements, if necessary.

Findings:

Interaction with students and laboratory personnel has established the following complaints to be genuine.

1. The equipments in the lab are old and the equipments required as a part of new curriculum are absent.
2. The present equipments and machinery are not regularly maintained so some of them perform inefficiently and some don't work at all.
3. There is no provision of backup power supply so lab activities cannot be completed in the provided time.

Recommendations:

1. The operations and maintenance committee should be directed to ensure the timely maintenance of the equipments of hydrolab for their smooth functioning.
2. A part of the funds from foreign countries may be utilized for the purchase of brand new machinery required as per the new curriculum.
3. Provision of backup generator should be made for times of load shedding periods.

Letter Report

Department of Civil Engineering
Pulchowk Campus

Lalitpur

Letter enclosed herewith in ref. Your Ref.

28th June, 2018

Prof. Dr. Gokarna Bahadur Motra
Campus Chief

Pulchowk Campus

Lalitpur

Subject: Hostel Inspection Report

Dear sir,

This letter is in reference to the survey conducted in 17th June, 2018 on the condition of Boys' and Girls' hostel for 1 week.

The inspection has been conducted according to the desired schedule and keeping the interest of students in mind.

1. Introduction.

Hostel is an important place for the students. It is like a second home. It is a nice facility provided by the college for the students outside the valley but is in limited number. Lately, there have been some complaints from the students of hostel about the environment of hostel.

2. Hostel

2.1 Girls' Hostel

Girls' hostel was comparatively clean. Its outside as well as inside area were clean. There was not much complaints from the students as well as hostel staff. Students were punctual with rules and regulations of the hostel.

2.2 Boys' Hostel

Boys' hostel was comparatively stained. The beds were unmanaged and cigarette butts were seen on back side of the building. Punctuality of hostel students was questioned by the hostel staffs and minor disputes were also caused inside the hostel premises related to politics. Junior students also complained about loud noises after midnight making them difficult in sleeping.

3. Measures to be taken for improvement :

3.1 Formulation of strict rules

Making rules about prohibiting illegal entry of students in hostel and punctuality can be done.

3.2 Cleaning programme

Participation of the hostel students for cleaning the hostel surrounding may be done for a clean environment around hostel.

3.3 Preference to study

Only study related activities should be allowed inside hostel. Other activities such as music practice and meetings should be conducted outside the hostel.

4. Conclusions:

From the survey, it can be concluded that environment of hostel need to be improved especially for boys and many further measures need to be taken.

Hope this report covered all desired aspects.

Thank you.

Yours sincerely

Omprakash

Kamal Bista

Writing

* Writing Reports

1) Formal

2) Informal

1) Formal report:

* Parts/Components:

I. Preliminary section

- Coverpage
- Letter of transmittal
- Title page
- Acknowledgements
- Table of contents
- List of figures and tables
- Abstract / Executive summary

II. Main Section

- Introduction
- Discussion
- Conclusions
- Recommendations

III. Documentation Section

- Notes (Contextual / Foot notes)
- Bibliography
- Appendix (A, B, C):

I. Preliminary Section:

a) Coverpage: In the context of report writing, coverpage refers to an external cover of a report. It has two major requirements to fulfill, firstly it should require to protect the report which is considered to be an important document, the product of a very hard work and also an important document containing very imp. information obtained through a vigorous research, in this sense, the coverpage needs to be designed making sure that it is durable. Secondly, the coverpage is required to be very impressive in its physical layout, so that the audience, viewers and the judges can be impressed at the very first glance over it. Apart from this, a coverpage is also required to display some imp. details including category of report, title of report, name and post of the person who has submitted it followed by his or her institutional address and date of submission. A sample has been given below:

REPORT NO.: 101
=
A
REPORT
ON

IN UDAYAPUR

May 2, 2018

b) Letter of Transmittal: It is an official letter written from the authority or an individual to the concerned authority who is going to receive an official document such as report or proposal from him/her. It is written in formal style using polite expressions. It is very precise in length. It contains some details about what kind of document is being sent to his/her recipient and requesting him/her to accept it in a most polite manner.

Sample:

COMMISSION FOR POLLUTION STUDY

DHUMBARAHI, KATHMANDU

(Last name)

d) Acknowledgement: It refers to an act of acknowledging the help & assistance obtained from diff. individuals on various occasions. In course of writing a report based on a research, the author of the report may want to acknowledge the help and assistance that he/she has obtained from various personnel on various occasions right from the moment he/she started the research until he got his report published. While writing acknowledgements, sufficient attention has to be paid on making the language very polite and arranging the names and posts of the people whose help is going to be acknowledged in proper sequence. A sample:

ACKNOWLEDGEMENTS

I am would like to extend my cordial gratefulness to Prof. Dr. Bhupendra Prasad Timilsena, my respected supervisor, for his invaluable scholarly guidelines, encouragement and inspiration which have been proved really precious for me to complete my research.

I am equally indebted to Prof. Dr. Shitabara Adal, the head of Department, for her consistent co-operation, support, love and care throughout the prolonged duration of time that I had to devote in various experimental works.

My thanks are also due to my dear parents and family members for their untiring moral and physical support as well as enduring patience.

Last but not the least, My thanks goes to Ms. Pallavi Upadhyaya, the Graphic designer and computer operator of Universal Computer corner, without whose cooperation I could never have expected to prepare the present report in this shape.

c/w) Suppose you are the chairman of a committee formed for investigating the impact of flood in your local VDC or municipality and you are going to submit your report soon. Write acknowledgements for your report.

ACKNOWLEDGEMENTS

I would like to express my sincere gratitude to Dr. Dipesh Shrestha, my respected supervisor, for his invaluable guidelines, encouragement and inspiration which have been proved really precious for me to complete my report.

I am equally indebted to Mr. Biswas Adhikari, the head of the Disaster Risk Management of Chaudandi Gadhhi Municipality for his consistent co-operation, support, love and care throughout the prolonged duration of time that I had to devote in various experimental works.

My thanks are also due to my parents, family members and friends for their untiring moral and physical support, as well as enduring patience.

Last but not the least, my thanks go to Ms. Madhavi Shrestha, the Graphic Designer and Coverpage designer and Mr. Madan Tiwari, the computer operator of Professional Computer Institute, without whose co-operation, I could never have expected to prepare the present report in this shape.

e) Table of Contents: Table of contents is simply a list of topics and sub-topics arranged chapterwise, with page numbers on the right hand margin indicating where each of those topics and sub-topics lie in the main body of the report. It will help the readers and viewers to locate the desired topic in a more economical manner in terms of the consumption of time in turning over the pages of a voluminous report. A sample has been given below:

TABLE OF CONTENTS

Abstract	(i)
Acknowledgements	(ii)
1. Introduction	1
1.1 Background	2
2. Literature Review	5
3. Methodology	12
4. Discussion	15
5. Results	21
6. Conclusions	27
7. Recommendations	31
References	I
Appendices	II

f) List of figures and tables:

Like table of contents, list of figures and tables also presents a list of different diagrammatic representations displaying data. It helps the readers to find out the tables and figures of their choice in a relatively shorter period of time and helps them to economize their time and energy in finding the desired table, graphs, charts or figures. A sample:

LIST OF TABLES		
S.No.	Table No.	Page No.
1.	Table No. 1: Population	5
2.	Table No. 2: Sites Visited	19
3.	Table No. 3: People Interviewed	27

g) Abstract / Executive Summary:

The terms abstract and summary mean more or less the same thing in almost every dictionary. We find these two terms defined as a shorter version of a lengthy text. However, there are some significant differences bet" these two terms in their applications. Summary has a broad sense and it is quite general. Any text written by reducing the size of its original one is considered to be a summary while abstract is a more technical term used mostly in technical documents such as reports, thesis, proposal, research articles, seminar papers, etc. An abstract ^{is} generally more precise than a summary. It is just 2-5% of its original one but summary is 1/3 the size of its original one. An abstract of a report presents an overview of the main things like topic of report, objectives, methodology, findings/conclusions, and suggestions briefly stated. A sample has been given:

Abstract

This report contains the details of the findings of the research entitled 'Study on the causes of the Air pollution in Ktm' which was carried out in order to explore the major factors responsible for causing air pollution in Kathmandu, the capital city of Nepal. Based mainly on the primary sources of data specifically observations and interview, it reveals the fact that there are numerous factors playing major roles in polluting the air in this city. According to the findings of this research, rough and dusty roads, open drainage, open air toilets, unsystematic human settlements, over-population,

fast growing number of vehicles, workshops, industries and factories as well as heavily polluted rivers and streams are main causes of air pollution in Kathmandu. It also suggests that negligence in the implementation of remedial measures may cause devastating consequences in the days to come.

(W) Suppose you are the chairman of a committee formed in order to investigate the impact of drinking contaminated water on the health of the public in your local town and you are writing report to submit it to the concerned authorities. Write an abstract for your report.

Abstract

=

This report contains the details of the findings of the research entitled 'Study on the impact of drinking contaminated water on the health of public in Chaudandigadhi' which was carried out in order to explore the health related problems arising in the public due to contaminated drinking water locally available in the river.

I) Main Section:

a) Introduction:

In the context of writing report, introduction is considered to be one of the major components. Unlike the intro of an ordinary document such as essay, the intro of a report is much more comprehensive and contains several sub-components within it. Generally, the intro section of a report contains the sub-components like background, objectives, methodology, limitations of study, significances of study and even literature review. A brief sample has been given below:

Introduction

Background

Air pollution is one of the most serious environmental problems in Kathmandu at present. The problem of air pollution arose in this city along with the process of modernization and urbanization of this ancient hilly city. With the fast pace of expansion of this city and the modernization process, the pace of air pollution also grew very rapidly. Day by day, this problem has begun to create havoc and health hazard in Ktm. Thousands of people especially, children and the elderly people have been the victims of various air-borne diseases, respiratory problems leading to lungs cancer.

Objectives

General objective

The general objective of this research is to investigate the major causes of air pollution in Kathmandu.

Specific Objectives

The specific objectives of this research are:

- a) to find out the causes of air pollution in Kathmandu.
- b) to explore some remedies to this problem, and
- c) to suggest the concerned authorities and agencies how this problem can be mitigated or minimized.

Limitation of the study:

The present research is limited to the investigation of the causes of air pollution in Kathmandu. It is also limited to primary sources of data basically observation and interview. In order to collect the necessary data, altogether five most badly affected locations including Kalimati Chowk, Thapathali chowk, Putalisadak Chowk, New Road and Thamel have been chosen for collecting the necessary samples of the air.

Significance of study:

The result of the present research is expected to be highly beneficial to the local people, ^{health workers & local leaders}, researchers, students, and scholars equally. It may certainly help the government authorities to identify the most severely affected areas and people in KTM and provide them with the necessary remedial services immediately and take some steps in the direction of mitigating the problem.

b) Discussion:

Discussion is also one of the major components of a report. It contains the details of data collected through various sources in discussion section, the data available are displayed through different varieties of illustrative devices such as tables, graphs, charts, diagrams, and figures. It may also contain a very critical analysis and interpretation of data leading the researcher to a logical conclusion. A sample has been given below:

Table Above

Discussion

The table given above contains the presentation of data collected through various sources. It shows that there are numerous factors causing air pollution in Kathmandu. According to the data presented in the above table, the maximum amount of (40%) of air pollution in this city is caused by the rough and dusty road followed by open drainage (30%), improperly managed garbage and sewage (20%), old and outdated vehicles (5%) and factories, industries, workshops (5%) respectively. It is also that the rate of growth of air pollution in Kathmandu is enormously high which is really frightening. If the ^{present} rate of growth of air pollution continues unchecked in future, Kathmandu will no longer remain a suitable place for human habitation by next 20 years.

c) Conclusion:

Conclusion is another major component of a report. It contains the details of what the researcher has concluded from the observation, study, analysis, and interpretation of the existing data. Conclusion is also known as inference or deduction existing proof and existence and scientific analysis. In most of the reports, we find results, findings and conclusions given under a single heading/topic. Because they contain details which are interrelated and have similar functions. A sample:

=

Conclusion

=

from the analysis and interpretation of the existing data, it can be concluded that there are numerous factors responsible for causing air pollution in Kathmandu. It can also be concluded that the problem of air pollution in this city is increasing at an alarming rate. It is increasing so fast that the environment especially the quality of air in Kathmandu is likely to be deadly poisonous and Kathmandu, the capital city of modern Democratic Republic state, is sure to be converted into a death-trap for her entire populace within a short duration of 20 years. Therefore, an ~~an~~ immediate action has ~~to~~ been very urgent for saving Kathmandu from being so.

d) Recommendations:

In the recommendation section of a report, the author will express his/her ~~suggestions~~ ^{suggestions} thanks and gratefulness to all the people from whom he/she has obtained help and assistance during his/her research until he/she got the report published. Suggestions to the authorities for minimizing and controlling the existing problem. The arrangement of items of suggestions is generally made point-wise, arranging each item in a most sensible and systematic order according to the level of their priority. The most important suggestion will be enlisted first followed by the other less important ones. A sample has been given below:

Recommendations

For the control and remediation of the existing problem of air pollution in the city of Kathmandu, following suggestions have been recommended:

1. The rough and dusty road should be black-topped immediately.
2. The old vehicles with outdated engines should be banned.
3. The open and drainage should be repaired or replaced soon. ^{damaged}
4. The garbage and sewage dumped at the roadsides should be removed or scientifically managed immediately.
5. The open public spaces should not be littered.
6. very strict rules should be made for saving these

places from being used as public open toilets.

7. Those found guilty should be held and punished strictly.
8. Rivers in Kathmandu should be kept clean.

II) Documentation Section:

According to the convention of research, the data, details and quotations which the researcher has borrowed from the books, journals, research articles, reports & other kinds of research documents need to be documented in a proper & scientific manner. As suggested in MLA or APA, system of citation to avoid plagiarism, which is ~~like~~ a kind of violation of copyright laws. In other words, while including the quotations, data and details borrowed from the research docs of other writers, it is necessary for a researcher or the writer of any report and research document to indicate their sources very clearly. Various kinds of details including the writer's name, title of book/journal, publisher's name & address, page numbers edition and volume number need to be mentioned. This is ~~done~~ like documentation. It can be done in diff. ways and place as mentioned below:

2) Notes:

The author of a report or a research doc. can document the sources of borrowed data, details & quotations in two types of notes, firstly contextual note which refers to the inclusion of the writer's last name, yr. of publication or page no. in brackets immediately after

the quotation enclosed in quotation marks inside the main body of the report itself. Secondly, footnotes which refers to the inclusion of the same details indicating the sources given at the bottom of the same page.

2) Bibliography:

"~~work~~ cited" and references are the alternative terms mostly used interchangeably. No matter whichever term we might used, these terms refer to the practice of listing the title of book, journals, magazines, research articles, Seminar papers, reports, thesis and any other research documents from which the writer of report has borrowed some data, details & quotations. In the bibliography references & work cited, various details including writer's name, title of book, journal & other docs, publishers name & address, yr of pub, page no., volume, & edition no. are mentioned in alphabetical order according to the writers ~~last~~ last name. While preparing bibliography ref or work cited, there is a practice / system of applying either MLA system or APA system.

A sample has been given.

Bibliography

1. Acharya, T.P (2010). Basic Mathematics. Kathmandu: Kantipur Publication.
2. Bhatta, C.P(2009). fundamentals of Mathematics. Bhairahawa: Lumbini publication.
3. Chhetri, D.P (2018). Elements of Mathematics. Pokhara: Bindavasini Publication.

3) Appendix:

In a very simple term, appendix is an additional part or component which is appended to the research document. Appendix generally contains some less important details, data and documents which could not be incorporated in the main body of research document either because of lack of space or because of lack of preference. Appendix may have categories such as - Appendix - A
- Appendix - B
- Appendix - C, etc.

If appendix-A contains tables, Appendix-B may contain graphs & app-C may contain the official documents exchanged betⁿ the authorities & the researcher.

Writing Proposals

*> Types:

- I) 1. Solicited proposal (selected through competition)
2. Unsolicited " (relative of the authorities)
- II) 1) Sales " (who wants to sell the capability, knowledge)
2) Research / Academic

*> Sales/Technical proposal:

*> Parts/Components

1. Title page
2. Abstract
3. Statement of the problem
4. Rationale
5. Objective
6. Methodology
7. Cost Estimate / Budget
8. Time Management / Schedule
9. Evaluation / Follow-up
10. Works cited Page

II) Informal Report:

- i) Letter Report
- ii) Memo Report

Other Reports:

- /1) Progress Report
- /2) feasibility Report
- 3) Empirical/Scientific/Technical Research Report

i) Letter Report

Parts/Components:

- 1. Letterhead
- 2. References (Year/Our Reg)
- 3. Date
- 4. Inside Address / Receiver's Address
- 5. Subject
- 6. Salutation
- 7. Introduction
- 8. Discussion
- 9. Conclusion
- 10. Recommendation
- 11. Subscription
- 12. Signature
- 13. Writer's name
- 14. Writer's post

ii) Memo Report:

Parts/Components:

- 1. Heading
- a. To:
- b. From:
- c. Date:
- d. Subject:
- 2. Introduction
- 3. Discussion
- 4. Conclusion
- 5. Recommendation
